- Drupal
- Vue.js
- Gatsby.js
- PostgreSQL, MongoDB

FORMAL EDUCATION

Northeastern University
Boston, MA – May 2012
B.S. in Business Administration
(Finance Concentration)

HOBBIES & INTERESTS

- Hiking & Backpacking
- Fly-fishing
- Photography
- Woodworking

PROFESSIONAL EXPERIENCE

National University

Lead Web Developer
WordPress Developer

Remote

June 2022 – present

June 2021 – June 2022

- Manage the ongoing development & maintenance of National University's flagship website, as well as additional sites for affiliated schools and subsidiaries.
- Develop fully custom WordPress themes & plugins to help support business goals and initiatives from the broader marketing department.
- Integrate front-end website forms with numerous external and third-party platforms, often requiring the creation of custom back-end APIs.
- Provide guidance, mentoring, training, and code reviews for 3 junior developers.
- Manage the team's git-based workflow, including CI/CD build process and code deployment.
- Serve as a subject matter expert in providing input and feedback to the University's enrollment and data ops teams with regards to new project requests.

Recent Project Highlights:

- **PHP Version Upgrades:** Oversaw & directed the successful migration of all legacy codebases from PHP 7.4 to PHP 8.0.
- **External Platform "Lead Capture" Data Flow:** Created a custom WordPress plugin which contains a series of custom API's that allow web form responses captured via a third-party platform to integrate with our site for further data processing, before ultimately flowing through to our Salesforce CRM platform.
- **Dev Team Knowledge Hub:** Taking the lead on building out internal "developer documentation", in attempt to minimize the pain of dealing with a massive legacy codebase and prevent "lost knowledge" due to team turnover.

Stilts Media Designs Co, Auxilia Website Design

Contract Full-Stack Developer

Remote

Mar 2019 – July 2021

Operated as a business-to-business subcontractor, completing regular work on a weekly basis for two established development agencies. Projects varied in size and scope, including custom-built WordPress solutions, full-stack JavaScript web apps, large-scale eCommerce builds, and basic troubleshooting & maintenance of client legacy projects.
